## 2005 ISNR CONFERENCE

---

### Abstracts of Conference Presentation at the 2005 International Society for Neuronal Regulation (ISNR) 13th Annual Conference, Denver, Colorado

#### **EDITORIAL NOTE: INTRODUCTION TO THE 2005 ISNR CONFERENCE ABSTRACTS**

The most recent and exciting scientific information is often presented at conferences long before it makes its way through the peer review process into print. As a compromise between timeliness and thorough review, we once again print the abstracts of student scholarship and scientific papers presented at the annual conference of the International Society for Neuronal Regulation (ISNR).

In full form these papers were presented in twenty-, forty-, and sixty-minute time slots, and contained much more detail than their abstracts would indicate. Although the abstracts presented in this issue of the *Journal of Neurotherapy* have not undergone the rigorous peer review process the *Journal* routinely applies to scientific papers, nevertheless they are reviewed carefully. The papers presented at the ISNR conference were first reviewed by the conference committee headed by Roger deBeus and Noland White. These papers were screened for accuracy and standards of scientific reporting by the committee. Brenda Baird reviewed papers that were submitted by students and David Trudeau screened all papers for content and accuracy.

Authors who prepare their work for presentation at the conference are often summarizing their most recent research. It is hoped these presenters will develop their topics into full manuscripts, submitting to the rigors of peer review in this or other journals.
