CLINICAL CORNER

D. Corydon Hammond, PhD, Associate Editor

The purpose of the Clinical Corner is to provide responses to clinically oriented questions which may not yet have been evaluated by research. Personal opinions expressed in the column are opinions of the authors often based on clinical experience and in no way represent an official stance of the International Society of Neurofeedback and Research or the editors of the Journal of Neurotherapy. It is hoped that the diversity of opinion expressed in this column stimulates thought and further exchange of ideas. Readers are invited to send questions for consideration to: D.
