## Cash Award for Student Paper Extended

Due to unavoidable delays in the publication of Volume 4, the special unrestricted cash award of \$1000 for the best student research paper published in the journal has been extended to include Volume 4 and Volume 5 (2000-2001). The paper must be written according to the instructions to authors, which can be found in each issue of the journal and on the SNR web page at [snr-jnt.org](http://snr-jnt.org). The papers must not be under consideration for publication elsewhere. Submissions must be deemed to be publishable by editorial and peer review, and must be revised as directed by the journal peer-review process.

The principle author of the submitted paper must be a full-time student during the writing of the paper and at the time of submission. Papers submitted by former students will not be eligible for the competition. Student status during the preparation of the paper and at the time of submission must be verified by a cover letter from the student's advisor. Students from baccalaureate level through postdoctoral programs (including residencies and internships) are eligible. Papers that have been submitted and/or presented for competition at SNR annual meetings are eligible, and the award will not conflict with other awards offered by SNR. Papers co-authored by the editor or associate editors will be eligible for competition. Papers must be received no later than March 1, 2001. Judges not connected with the *Journal of Neurotherapy* will conduct an impartial and blind review process, based on points.

Haworth Press makes this award possible by a cash contribution to the journal and SNR, to be used as SNR wishes. To encourage publication of important work by student researchers, the SNR board and the editorial board of the journal have directed that this money be used to encourage student publication.
